

DEEP ROOT

**BUILDS ROOTS
&
REDUCES THE NEED FOR WATERING**

GENERAL INFORMATION:

Soil organic matter is a critical factor not only maintaining a healthy environment for the microbial activity necessary to feed root systems, but also maintaining an adequate supply of moisture around those root systems. It has a direct bearing on Cation Exchange Capacity, thereby influencing the ability of roots to take up nutrients from the soil.

DEEP ROOT is specially formulated to raise organic matter levels and retain soil moisture where it is needed - at the roots. Derived from the highest possible quality dry HUMATE, it is a super-concentrated product that will have a direct effect on the amount of watering required.

DEEP ROOT

?*Will put back life in your Turf / Grass.

?*When used with other plant fertilizers will make them more accessible to plants and their root system and will make the lawn fertilizer more potent and effective.

?*Will help retain moisture longer even in drought conditions.

?*Will assist the plant / turf to pick up valuable minerals and vitamins that are naturally contained in the soil.

?*Will build your soil to a healthier state, able to support microbial life.

?*Will help raise Organic Matter. (with repeated use)

?*Will help Newly Laid turf / Plugs, Spread evenly and faster.

?*Safe for the environment and non toxic to people and pets when applied as directed.

?*Will help to detoxify any harmful chemicals in your soil.

?*Will help buffer pH problems that your soil may have.

?*Will help plants that have been having problems growing to start growing.

DEEP ROOT contains chelators, enzymes, vitamins and is safe to use and environment friendly. Treated areas can be entered immediately.

Treat soils with **DEEP ROOT** prior to placing down new turf and watch your turf roots take off quicker and stronger. Or treat each plug with **DEEP ROOT** the runners start quicker than untreated.

Mix **DEEP ROOT** with herbicides and cut back Herbicide rate by 25% and receive the same kill.
