

# MicroBoost MG

CHELATED MAGNESIUM  
MICRO-NUTRIENT

"COMMERCIAL USE ONLY"

Chelated Magnesium (MG)..... 4.0%

Derived from: Magnesium Glucoheptonate.

Harmful if swallowed. Avoid contact with eyes, skin, and clothing. If on skin, wash with large amounts of soap and water. If in eyes, rinse repeatedly with clean water. If irritation persists, obtain medical attention.

### Directions:

Apply 1-2 pt (s) for ROW CROPS to 2-4 qts for FRUIT TREES. with sufficient water to cover per acre. Moisten both sides of the leaves only to the point of run-off. \*Repeat as indicated visually or by leaf tissue test, or as part of a regular maintenance foliar feed program.\*

*\*\*\*Highly concentrated DO NOT over apply. \*\*\* To ensure compatibility with foreign spray mixes, a jar compatibility test is recommended before mixing with other products other than water in the tank. Always fill tank with water first, then begin applying CROPMASTER products while tank is circulating. \*NEVER MIX CONCENTRATES DIRECTLY TOGETHER \**

**CONDITIONS OF SALE: BUYER ASSUMES ALL RESPONSIBILITY FOR USE, STORAGE, HANDLING AND DISPOSAL OF THIS PRODUCT WHEN NOT IN ACCORDANCE WITH LABEL DIRECTIONS. U.A.S. INC. AND ITS DISTRIBUTOR'S LIMIT OF WARRANTY**

**Disclaimer**  
It is recommended not to use this product with fungicides or pesticides. However, if applied with a fungicide or pesticide, it is the users responsibility to conduct a trail application on the crop(s) to be sprayed with this mix of chemicals to determine compatibility of products and compatibility with crop(s) sprayed. When mixing with other spray materials a jar compatibility test is recommended. Always read label instructions.

Why Do I need MAG HUME  
MAG HUME is a chelated Magnesium Source, designed for soil and/or foliar application, to prevent and correct pre-existing Mg deficiencies as indicated by plant leaf, visual and/or soil testing. Since the ingredients in MAG HUME are 100% water soluble and immediately available to the plant (When used as directed), this product is extremely efficient as a foliar spray in situations where a rapid response is desired. Results are often evident one to two days after application. Research has shown the plant can assimilate Micro nutrients better via foliar application than if the Micro nutrients were applied to the soil. The response is quicker and seems to be more effective.  
CHELATING AGENT: We Chelated our MAG HUME with Humic acid, which is known as one of the best chelating agents around.

Storage: Keep container sealed tightly when not in use. Do not expose to sunlight for long periods of time. Store in temperatures between 5 C (41 F) and 25 C (77 F).

Dispose of Waste Material according to local, state, and Federal environmental laws and regulations.
