

PROVOKE

Provoke is a proprietary blend of Humic acid Cytokinins, indoles, auxins, and Gibberlic used to help aid grasses to fill into areas where there is little to no growth, giving you an overall lusher healthier stand of turf. Also can be used in areas where heavy traffic has placed a stress on the condition of the turf..

The Humic acid acts as the carbon source to feed microbes.

Cytokinins - are cell division factors, which rapidly divides cells

Indoles - are naturally occurring plant growth promoters for root development and bud initiation.

Auxins - promote rooting and cell enlargement.

While the Gibberlic acid may be useful for inducing the growth of some grasses in the fall and again in the spring. Gibberlic acid has been used successfully in the spring to induce growth in bluegrasses and Bermuda grasses when growth would not have otherwise accrued. Will also aid Bermuda grass turn to greener within 10 days.

STORAGE

Keep container sealed tightly when not in use. Do not expose to sunlight for long periods of time. Store in temperatures between 5 C (41 F) and 25 C (77 F).

Dispose of Waste Material according to local, state, and Federal environmental laws and regulations.

CAUTIONS

WARNING do not mix with low ph solutions or high calcium or phosphate solutions.

DISCLAIMER

It is recommended not to use this product with fungicides or pesticides. However, if applied with a fungicide or pesticide, it is the users responsibility to conduct a trail application on the crop(s) to be sprayed with this mix of chemicals to determine compatibility of products and compatibility with crop(s) sprayed. When mixing with other spray materials a jar compatibility test. Harmful if swallowed. Avoid contact with eyes, skin, and clothing. If on skin, wash with large amounts of soap and water. If in eyes, rinse repeatedly with clean water. If irritation persists, obtain medical attention.

GUARANTEED ANALYSIS

Gibberlic Acid 0.02%

Compatibility

Test-To ensure compatibility with foreign spray mixes, a jar & Crop to be Sprayed, compatibility test is recommended before mixing with other products other than water in the tank.

APPLICATION

Turf: With sufficient water to cover, apply up to 7 oz per 1000 ft². Start applications in initial growth stage and continue every 3 to 4 weeks. Also can be used on new sod or newly seeded turf. Apply just before dormancy and once after dormancy to help improve winter stress.

Ornamentals: Apply 1-2 oz with sufficient water to cover per 1000ft² of ornamentals. Use in a regular spray program, every other spray.

Rooting and Transplants: Sip cuttings into solution of 8 Oz of Provoke to 5 gallons of water. Transplants can be dipped into solution of 4 oz per 5 gallons of water.
